

Less is **More**

For Superior Perimeter protection, **one** RISCO Wireless Twin Beam offer more than **three** PIR curtain detectors*

More Air

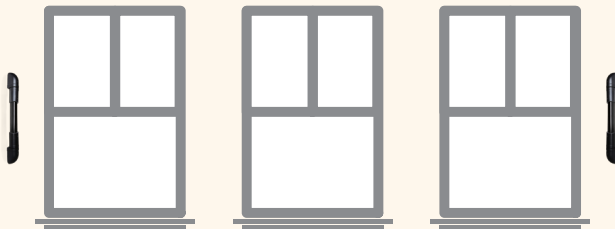

Wireless Twin Beam provides perimeter protection while allowing you to leave windows open to the breeze - with no concern of false alarms.

More Freedom

Perimeter protection with Wireless Twin Beam allows freedom of movement in the room without causing false alarms, even close to the window.

More Affordable

A single Wireless Twin Beam can protect several windows with its 10m range, in place of up to 3 curtain PIRs - one for each room or window.

* Typical home installation with three windows
